INTERNATIONAL SOCIETY FOR COMPUTERS AND THEIR APPLICATIONS

17th International Conference on
Parallel and Distributed Computing Systems

September 15-17, 2004
The Canterbury Hotel, San Francisco, California USA

TECHNICAL PAPER INDEX

SPECIAL PRESENTATION:

Fractal Computation in Step with Real-Time Dance
Jennifer Burg and Tim Miller (Wake Forest University, USA) 1
(This peer-reviewed paper has been invited for an extended presentation because of its artistic nature.)

PARALLEL ALGORITHMS

Parallel Walking Tree Method for Sequence Recombination
Tai Hsu (Northwestern Polytechnic University, USA) and Paul Cull (Oregon State University, USA) 7

Parallel Computation Applied to Dynamical Systems
Selim G. Akl and Weiguang Yao (Queen's University, Canada) 13

Optimal and Non-Optimal Parallel Implementations of the Sequential Minimal Optimization Algorithm for Support Vector Machine Training
Benjamin Castaneda, Juan C. Cockburn and Muhammad Shaaban (Rochester Institute of Technology, USA) 21

Efficient Parallel Hierarchical Clustering Algorithms
Sanguthevar Rajasekaran (University of Connecticut, USA) 27

An Optimal Generalized Columnsort Algorithm for a Simplified 2D ARPBS
Min He (California State University, Long Beach, USA) and Si Qing Zheng (University of Texas at Dallas, USA) 33

Fast Parallel Matrix Multiplication Algorithms on Optical Bus Fully Shuffled Trees
Safia H. Deif (National Telecommunication Institute, Egypt), Omar H. Karam (Ain Shams University, Egypt) and Samir I. Shaheen (Cairo University, Egypt) 39

Randomized Sorting on the POPS Network
Jaime Davila and Sanguthevar Rajasekaran (University of Connecticut, USA) 45

A Locality Preserving Graph Ordering Approach for Implicit Partitioning: Graph-Filing Curves
Stefan Schamberger and Jens-Michael Wierum (Universität Paderborn, Germany) 51

ALLOCATION AND SCHEDULING TECHNIQUES

On Scheduling Computation-Dags for Internet-Based Computing
Arnold L. Rosenberg and Matthew G. Yurkewych (University of Massachusetts at Amherst, USA) 58

A VFS Scheduler for Radiative Transfer Data in Climate Models
S. P. Muszala, G. Alaghband, D. A. Connors (University of Colorado, Boulder, USA) and J. J. Hack (National Center for Atmospheric Research, USA) 64

Increased Scheduling Quality by Utilizing the Flexibility of Malleable Jobs
Jan Hungershöfer (Paderborn Center for Parallel Computing, Germany) 72

Dynamic Loop Scheduling with Processor Groups
Ricolindo L. Cariño and Ioana Banicescu (Mississippi State University, US), Thomas Rauber (University of Bayreuth, Germany) and Gudula Rünger (Chemnitz University of Technology, Germany) 78

Application Placement on a Cluster of Servers
Bhuvan Urgaonkar, Arnold Rosenberg and Prashant Shenoy (University of Massachusetts, USA) 85

Network Aspects of Grid Scheduling Algorithms
Pieter Thysebaert, Bruno Volckaert, Filip De Turck, Bart Dhoedt, Piet Demeester (Ghent University, Belgium) 91

An Investigation of Scheduling in Distributed Constraint Logic Programming
Karen Villaverde and Enrico Pontelli (New Mexico State University, USA) 98

High Performance Duplication-Based Algorithm for Compile-Time Task Scheduling in a Bounded Number of Heterogeneous Machines
Tarek Hagras and Jan Janecek (Czech Technical University in Prague, Czech Republic) 104

GRID AND P2P COMPUTING AND SERVICES

Trusted Grid Computing with Security Assurance and Resource Optimization
Shanshan Song and Kai Hwang (University of Southern California, USA)..... 110

A Trade-Based Access Control Modal for Grid
Minghhong Zhou, Yuzhong Sun and Zhiwei Xu (Chinese Academy of Sciences, China) 118

Decentralized and Hierarchical Discovery of Software Applications in the iShare Internet Sharing System
Xiaojuan Ren, Zhelong Pan, Rudolf Eigenmann smf Y. Charlie Hu (Purdue University, USA) 124

R-Chain: A Self-Maintained Reputation Management System in P2P Networks
Lintao Liu, Shu Zhang, Kyung Dong Rhy and Partha Dasgupta (Arizona State University, USA) 131

FRAMEWORKS AND MIDDLEWARE FOR PARALLEL AND DISTRIBUTED COMPUTING

FG: A Framework Generator for Hiding Latency in Parallel Programs Running on Clusters
Thomas H. Cormen and Elena Riccio Davidson (Dartmouth College, USA) 137

Design, Implementation and Performance of Fault-Tolerant Message Passing Interface (MPI)
A. David Selvakumar, P. M. Sobha, G. C. Ravindra (C-DAC, India)and R. Pitchiah (Electronics Niketan, India) 145

NPSMT: A Simulation Environment for SMT Packet Processors
Behnam Robatmili, Nasser Yazdani (University of Tehran, Iran) and Mehrdad Nourani (University of Texas at Dallas, USA)..... 151

An Agent-based Approach to Support the Scalability of Change Propagation
C. Constantinescu, S. Kornienko, O. Kornienko, U. Heinkel (University of Stuttgart, Germany) 157

PERFORMANCE MODELING, MONITORING, AND DEBUGGING TOOLS

Benchmarking Memory Performance with the Data Cube Operator
Michael A. Frumkin (NASA Ames Research Center, USA) and Leonid V. Shabanov (CrossZ Solutions, USA)..... 165

Analytical Performance Analysis for Parallel and Distributed Systems with Non-Exponential Service Centers
Ahmed M. Mohamed, Lester Lipsky and Reda Ammar (University of Connecticut, USA) 172

A Characterization Methodology for Parallel Systems Benchmarks
Paolo Cremonesi, Lorenzo Muttoni and Giusseppe Serazzi (Politecnico di Milano, Italy) 178

An Approach for Fine-Grained Profiling of Mesh-Based Parallel Programs
Amol S. Deshmukh, Qingyuan Liu and Karen Tomko (University of Cincinnati, USA) 186

DISTRIBUTED ALGORITHMS

A Distributed Algorithm for Detecting Deadlocks under the OR Model and the Resolution Based on Hardware Clocks
Xinli Wang and Jean Mayo (Michigan Technological University, USA) 193

Finding Central Sets of Tree Structures in Synchronous Distributed Systems
Jonathan W. Berry (Lafayette College, USA), Daniel Hrozencik (Chicago State Univeristy, USA), Shrisha Rao (Mount Mercy College, USA) and Zhizshang Shen (Plymouth State University, USA) 201

On Termination Detection in an Asynchronous Distributed System
Sathya Peri and Neeraj Mittal (The University of Texas at Dallas, USA) 209

A Lightweight Communication Algorithm for Guaranteeing Causally-ordered Delivery Semantics
ChaYoung Kim (Korea University, Korea) and JinHo Ahn (Kyonggi University, Korea) 216

RELIABILITY AND FAULT TOLERANCE

Adaptive-Subcube Fault Tolerant Routing in Dual-Cube with Very Large Number of Faulty Nodes
Yamin Li and Shietung Peng (Hosei University, Japan) and Wanming Chu (University of Aizu, Japan) 222

Automated Recovery with Transactions
Steven Reiss and Guy Eddon (Brown University, USA) 229

On Communication Protocols in Unreliable Mesh Networks and their Relation to Phase Transitions
Martin Nehéz and Dusan Bernát (Slovak University of Technology, Slovakia) 235

Practical Byzantine Fault Tolerance Using Fewer than 3f+1 Active Replicas
Ming Li and Yuval Tamir (University of California Los Angeles, USA) 241

PROGRAMMING LANGUAGES, COMPILERS, AND SYSTEMS

Meta Process Model and its Portable Parallel Programming Interface MpC
Hiroko Midorikawa (Seikei University, Japan) 248

An Adaptive OpenMP Loop Scheduler for Hyperthreaded SMPs
Yun Zhang, Mihai Burcea, Victor Cheng, Ron Ho and Michael Voss (University of Toronto, Canada) 256

SnapChain: A Shared Snapshot Method for Data Version Management
Yong Feng, Yan-yuan Zhang, and Rui-yong Jia (Northwestern Polytechnical University, China) 264

NETWORK AND DISTRIBUTED ALGORITHMS

Self-Stabilizing Algorithms for the Shortest Path Problem in Distributed Systems
Tetz C. Huang, Ji-Cherng Lina and Nathan Mou (Yuan-Ze University, Taiwan) 270

Heuristics-Based Replication Schemas for Fast Information Retrieval over the Internet
Samee Ullah Khan and Ishfaq Ahmad (University of Texas at Arlington, USA) 278

A Mechanism for Sequential Consistency in a Distributed Objects System
Cristian Tapus, Aleksey Nogin, Jason Hickey and Jerome White (California Institute of Technology, USA) .. 284

ARCHITECTURE

One-Level Cache Memory Design for Scalable SMT Architectures
Muhamed F. Mudawwar and John R. Wani (The American Univeristy in Cairo, Egypt) 290

Design and Evaluation of a Switch Architecture for Multistage Interconnection Network with Temporary Directory
Masato Sumiyoshi, Takashi Midorikawa, Yasuki Tanabe and Hideharu Amano (Keio University, Japan) 296

Scalable Switch for Uni-Directional MultiRing Network
Hamid R. Arabnia (University of Georgia, USA) and Xiangjian He (University of Technology, Sydney, Australia) 302

A Tight Bound for Scaling-Simulation Problem of Meshes with Separable Buses by Meshes with Partitioned Buses
Susumu Matsumae (Tottori University of Environmental Studies, Japan) 308

NETWORK COMMUNICATION, ROUTING, AND PROTOCOLS

The Self-Stabilizing Edge-Token and Its Applications
Shing-Tsaan Huang (National Central University, Taiwan) and Su-Shen Hung (Tsing Hua University, Taiwan)..... 315

The Fat-Stack and Universal Routing in Interconnection Networks
Kevin F. Chen and Edwin H.-M. Sha (University of Texas at Dallas, USA) 321

A New Multicast Queuing Mechanism for High-Speed Packet Switches
Min Song, Sachin Shetty (Old Dominion University, USA), Mansoor Alam (University of Toledo, USA), and HouJun Yang (Qingdao University, China) 327

Efficient Generic Multi-Stage Self-Stabilizing Algorithms for Trees
Jean R. S. Blair (United States Military Academy, USA) and Fredrik Manne (University of Bergen, Norway) 333

Jitter Controlled Quality of Service with Measurement Based Admission Control
Kannikar Siriwong (University of Connecticut, USA), Carolyn Pe Rosiene (University of Hartford, USA) and Reda Ammar (University of Connecticut, USA) 339

WIRELESS, AD HOC, AND MOBILE COMPUTING

Location Based Access to Moving Data Sources
Shiow-yang Wu (National Dong Hwa University, Taiwan) and Wei-chung Ko (Taiwan) 345

Securing the Ad Hoc On-demand Distance Vector Protocol
Michael Hitchens, Rajan Shankaran and Vijay Varadharajan (Macquarie University, Australia) 353

A New Movement Detection Scheme Based on Dynamic Region
Qinglin Zhao (Chinese Academy of Sciences, China), Li Feng (University of Hong Kong, Hong Kong) and ZhongCheng Li (Chinese Academy of Sciences, China) 361

High-Level Interoperability between Java-based Mobile Agent Systems
Giancarlo Fortino and Wilma Russo (University of Calabria, Italy) 367

Distance-Based Location Updating Cost Analysis in Mobile and Wireless Environments
Seung-yun Kim and Waleed W. Smari (University of Dayton, USA) 375

MULTIMEDIA SYSTEMS, IMAGE PROCESSING AND DSP

Fine-Grain Parallel Reconstruction Algorithm for MR Images
Hyo Jong Lee (Chonbuk National University, Korea) and Steven Potkin (University of California, Irvine, USA) 383

Providing Statistical QoS Guarantees for Interactive Operations in Parallel Multimedia Servers
Radhika S. Grover, Qiang Li and George Fegan (Santa Clara University, USA) 390

Parallel Implementation of an MPEG-2 Encoder using Message-Passing/Multithreading
Muhammad Shaaban and Jennifer Zenner (Rochester Institute of Technology, USA) 397

Loop Fusion via Retiming for DSP Applications
Meilin Liu, Qingfeng Zhuge, Zili Shao, Kevin F. Chen, and Edwin H.-M. Sha (University of Texas at Dallas, USA) 403

SPECIAL SESSION: ALGORITHMS AND TOOLS FOR REAL TIME AND DISTRIBUTED SYSTEM

..... 409

A Fault-contained Spanning Tree Protocol for Arbitrary Networks
J. El Haddad and S. Haddad (University of Paris Dauphine, France) 410

Object Oriented Mixed Scheduling Algorithm in Real Time Systems
Ilhyun Lee, Haesun K. Lee (University of Texas Permian Basin, USA) and Narayan C. Debnath (Winona State University, USA) 416

Code Embedding to Enhance File Security
M. R. Warsi (Aligarh Muslim University, India), Ayesha Siddiqui (Allahabad Bank, India) and N. Debnath (Winona State University, USA) 421

Usage of a Formal Result to Design a Causally and Totally Ordered Multicast Protocol
Christian Toinard (ENSI Bourges, France) 426

SPECIAL SESSION: APPLICATIONS OF GAME THEORY AND ARTIFICIAL INTELLIGENCE TECHNIQUES ON DISTRIBUTED COMPUTING AND INTERNET-WIDE COMPUTING

..... 431

Distributed Algorithms for DCOP: A Graphical-Game-Based Approach
Rajiv T. Maheswaran, Jonathan P. Pearce and Milind Tambe (University of Southern California, USA) 432

Fairness-preserving Degradation in Overloaded Multimedia Conferencing Systems
Thomas J. Marlow (Seton Hall Univerity, USA) and Sanjoy K. Baruah (The University of North Carolina, Chapel Hill, USA) 440

GameMosix: Game-Theoretic Middleware for CPU Sharing in Untrusted P2P Environment
Dmitri E. Volper, Jae C. Oh and Mina Jung (Syracuse University, USA) 448

SPECIAL SESSION: COLLABORATIVE AND COOPERATIVE ENVIRONMENTS 455

Collaborative Grid Environment for Scientific Virtual Organizations
L. Hluchy, E. Gatial, O. Habala, M. Maliska, V. D. Tran, J. Astalos, B. Simo, M. Dobrucky (Slovak Academy of Sciences, Slovakia) and P. Heinzlreiter (Joh. Kepler University Linz, Austria) 456

A Web Service-Based Platform for CSCW over Heterogeneous End-User Applications
Georgios-Dimitrios Kapos, Aphrodite Tsalgatidou and Mara Nikolaidou (University of Athens, Greece) 462

Pushmepullyou: The Reality of Interaction with Shared Objects in Networked Walk-in Displays
David Roberts, Oliver Otto and Robin Wolff (University of Salford, UK) 470

A Haptic Interface for Linked Immersive and Desktop Displays: Maintaining Sufficient Frame Rate for Haptic Rendering
Marcel Seelig, William Harwin (University of Reading, UK), David Roberts, Oliver Otto, and Robin Wolff (University of Salford, UK) 491

Message Traffic in a Distributed Virtual Envirionment for Close-Coupled Collaboration
Christoph Anthes, Paul Heinzlreiter (University Linz, Austria), Adrian Haffegee (The University of Reading, UK), and Jens Volkert (University Linz, Austria) 484

Supporting Ad Hoc Collaborations in Peer-to-Peer Networks
Ismail Bhana, David Johnson, Nia Alexandrov (The University of Reading, UK) 491

Building Collaborative Environments for Advanced Computing
Gareth J. Lewis, S. Mehmood Hasan, Vassil N. Alexandrov (The University of Reading, UK) 497

Using a Relaxed Memory Consistency Model to Support Collaborative Applications
Constanza Prieto and Yadran Eterovic (Pontificia Univ. Catolica de Chile, Chile) 503

WORKSHOP ON SECURITY IN PARALLEL AND DISTRIBUTED SYSTEMS 509

A Reputation-based Trust Management in Peer-to-Peer Network Systems
Natalia Stakhanova, Sergio Ferrero, Johnny Wong and Ying Cai (Iowa State University, USA) 510

Semantic Encryption Transformation Scheme
Willard Thompson, Alec Yasinsac, and Todd McDonald (Florida State University, USA) 516

A Framework for Role-Based Access Control in Group Communication Systems
Cristina Nita-Rotaru and Ninghui Li (Purdue University, USA) 522

Modeling and Performance Analysis of Network-Based Intrusion Detection Cluster
Yixin Jiang, Chuang Lin, Zhiguang Shan, and Zhen Chen (Tsinghua University, China) 530

Mobile Agent Data Integrity Using Multi-agent Architecture
J. Todd McDonald, Alec Yasinsac and Willard C. Thompson (Florida State University, USA) 536

Distributed Denial of Service: Taxonomies of Attacks, Tools, and Countermeasures
Stephen M. Specht and Ruby B. Lee (Princeton University, USA) 543

Role-based Trust Assignment in Trust Management Systems
Dongwan Shin and Gail-Joon Ahn (University of North Carolina at Charlotte, USA) 551

An Open Digest-based Technique for Spam Detection
Ernesto Damiani, Sabrina De Capitani di Vimercati (Università di Milano, Italy), Stefano Paraboschi (Università di Bergamo, Italy), and Pierangela Samarati (Università di Milano, Italy) 559

Detecting Grid-Abuse Attacks by Source-based Monitoring
Jianjia Wu, Dan Cheng and Wei Zhao (Texas A&M University, USA) 5657

A Tactical Security Architecture For Mobile Ad Hoc Networks
Steven T. Yuen and Raja Kambhampati (Rockwell Collins, Inc., USA) 572

WORKSHOP ON SCALABLE FILE SYSTEMS AND STORAGE TECHNOLOGIES 579

OpenCAS: A Flexible Architecture for Content Addressable Storage
Thomas C. Bressoud (Denison University, USA), Michael Kozuch and Casey Helfrich (Intel Research Pittsburgh, USA) and M. Satyanarayanan (Carnegie Mellon University, USA) 580

Transnet Architecture and Logistical Networking for Distributed Storage
Micah Beck, Ying Ding, Terry Moore and James S. Plank (University of Tennessee, USA) 588

INVITED SPEAKERS 594

"The ASCI/DOD Scalable I/O History and Strategy"
Gary Grider (Los Alamos National Laboratories, USA) 595

"Edna St. Vincent Millay Was Right"
Thomas Cormen (Dartmouth College, USA) 596

"The Future of Parallel File Systems in Computational Science"
Robert Ross (Argonne National Laboratories, USA) 597

"OSD and Intelligent Storage Systems: A New Era in Storage Systems Architectures"
Thomas M. Ruwart (University of Minnesota, USA) 598

"Secrets of High Performance Parallel I/O"
Tyce Mclarty (Lawrence Livermore National Laboratories, USA) - abstract not included
